Hi Eva.

Thanks for the note and for all your focused efforts on getting PH under your belt. I look forward to our upcoming discussions and trading of info to land on a good path together. It will be good to reconnect with Lori Cora on these issues, as we have had positive interactions on stormwater as things have developed and EPA counsel and past management came up to speed on our programs. I'll touch base with new staff and management in our WQ section, too, to keep the discussions in the right wheelhouses and make sure the collaboration pathways are open.

I'm attaching the requested ppt and email exchange with Rich. You will see in comparing DEQ SCD memos and EPA/CDM comments just before this email exchange with those after, that there were some refinements and more consistent content. That would be one goal in smoothly out our collaboration as we continue on into the last phases of source control work and most projects.

I also attached an email exchange I had with Deb Yamamota and Lori Cohen after briefing them on our source control work and stormwater programs. I'd like to work up a bit more on the exchanges DEQ had with Kristine Koch and others starting in 2006 or so as we jointly developed the stormwater program for Portland Harbor. I think it will be a good exercise for us all to walk back through some of that together and reaffirm the agreed to path and find agreement on how it has been followed toward meeting our source control objectives.

Look forward to our next discussions.

Subject: Re: draft EPA comments on Wilhelm Trucking Work Plan

Hi Alex-

Before we proceed, I need to obtain further clarification from our own counsel and management about how we're dealing with stormwater and our/my communications with DEQ. In that vein, it would help me if you could forward Rich's 9/26/13 email that you provided to me in hard copy today. Also, if you could also send me an electronic copy of the Stormwater Pathway Evaluation (June 30, 2015) powerpoint that you provided me during our first meeting, I would greatly appreciate it. It'll be easier for me to put it into our administrative records and also to forward to the appropriate folks.

BTW, Matt, I found your SC updated spreadsheet amongst all the other emails. I've forwarded to CDM to incorporate into their spreadsheet.

Thanks again for all the time, effort, and patience you, Matt, and the PMs have been giving me in getting me up to speed on PH.

Eva

Subject: draft EPA comments on Wilhelm Trucking Work Plan

Hi Eva (and all!)

Jim and I chatted about the latest work plan submittal from Wilhelm and EPA's draft comments on it. As we discussed in our meeting today, this is one where we would appreciate the comments being put on hold or rescinded. We agree with several of the comments, while we hope to keep dialoguing to work out some language again on how the PRGs are used and including the rank-order curves as a line of evidence. Importantly, though, we are going to reject the submittal because it is not what we asked for and does not lay out the additional work we were expecting. We will share a copy of the letter we send to Wilhelm reflecting that. Hopefully the new submittal will better address the comments (yours and ours) and then we can revisit commenting.

Meanwhile, the comments note that additional documents referred to in the plan would have been helpful for CDM/EPA in understanding the background, etc. Jim indicates that he has been diligent in providing the documents for the site and thinks you should have them in the record. As you/CDM are updating the review tracking table and looking into the record, perhaps you can pinpoint these documents and have them available/reviewed by the time the new submittal is ready for review? Or you can let us know what is missing and we will resend it.

Thanks again for the on-going coordination as you get up to speed in PH and we jointly focus on bringing the active source control projects to closure.

Talk to you soon.

Hi Jim-

Please see EPA's draft comments on the workplan. Please call or email if you have questions. Thanks.

Eva
